

What is Redux?

Redux is a predictable state container for JavaScript apps.

A black and white photograph of Dan Abramov, a young man with short, dark hair, wearing a light-colored t-shirt. He is shown from the chest up, turned slightly to his right, looking off-camera with an open mouth as if speaking. His right hand is raised, with fingers slightly curled. A professional microphone on a stand is positioned in front of him, angled towards his mouth. The background is dark and out of focus.

Dan Abramov
