

```
interface Person {  
  firstName: string;  
  lastName: string;  
}
```

```
function greeter(person: Person) {  
  return `Hello, ${person.firstName} ${person.lastName}`;  
}
```

```
let user = { firstName: "Jane", lastName: "User" };
```

```
greeter(user); // Hello, Jane User
```
